Re: Metro Controls

Metro Controls was involved in major renovations of our 1950's, 3-pipe, heating and cooling system. The idiosyncrasies of the system proved a challenge to installation of the Web CTRL system which was well met by Metro.

Since turnover, Metro has been very responsive to our needs. We are pleased with the professionalism of their field personnel as well as telephone technical support. We are now confident in making set point adjustments and can diagnose mechanical problems remotely.

Events requiring the use of church space often come with short notice. The ability to schedule the HVAC system remotely has proven invaluable in these instances.

I am pleased to endorse Metro Controls for the support and service we have received.
