Lynn M. Arnott-Bryks, Director

To whom it may concern:

I'd like to thank the entire staff at Metro Controls for the excellent products and service you provide to Macomb County. It's even better that you're a Macomb County business as well.

We were introduced to the Automated Logic brand in 2006. Our first project was the 209,000 Sq. Ft. Court Building in downtown Mt. Clemens. Since the implementation of the controls in that building we have converted another 14 county facilities to Automated Logic, with continued renovations and expansion on the way.

The most impressive thing about the Automated Logic WebCTRL system is its constant evolution with enhancements to make it even better. Additions like Time Lapse graphics, multi browser support and the easy to use trends are great enhancements. With the ease of scheduling not only are we able to save a great deal in energy costs, we can do more with fewer employees and survive the cutbacks we've had to endure.

When you couple these things with the service and training you provide, we continue to be a very satisfied customer.

Sincerely,  
Alfred Brys

Mechanical Systems Supervisor  
Macomb County Facilities and Operations
