SELFRIDGE ANG BASE, MICHIGAN**

March 12, 2013

Jeff Chambers, Project Manager  
Metro Controls Inc.  
22656 Fifteen Mile Rd.  
Clinton Twp., MI 48035

Jeff,

It is with great pleasure that I recommend Metro Controls. The Metro Controls Group along with Metro Environmental have been essential to the success for Civil Engineering to save energy and integrate a user friendly, reliable control system for HVAC systems at Selfridge.

Selfridge Air National Guard Base has a unique mission with demanding HVAC parameters that can be challenging to maintain optimum conditions.

Metro Controls was contracted to install and convert facilities that was not an easy task considering the complexity and magnitude of the project. Besides delivering a great product, the support has been exceptional. Regardless of whom we ask, the response is always prompt, courteous and helpful. Darryl's training sessions are perfectly tailored to the audience to be trained. This shop has gone from one guy with above average ability to all of the mechanics have a higher level of comfort and understanding of the Automated Logic system.

Metro Controls Group epitomizes the finest customer service and is the best contractor I have experienced in the 19 years I have been the shop supervisor.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Ellison", written over a horizontal line.
